• Gain Twist Rifled Barrel for Superb Accuracy
• Lighter Loads That The 460 Will Also Fire Include .45 Colt and .454 Casull
• Incredibly Low Perceived Recoil For All Loads

We all grew up hearing the phrase, "Faster than a speeding bullet...," but not when it is fired from Smith & Wesson's new Model 460XVR, with the highest muzzle velocity of any production revolver on earth. The Model 460XVR is so revolutionary that it required an entirely new designation...XVR, X-treme Velocity Revolver.

Starting with their Extra Large Frame, the Smith & Wesson engineers worked to deliver maximum velocity - over 2,300 feet per second - to reach the target faster than ever before. The 460XVR™ has interchangeable compensators to accommodate every load and its "gain-twist" rifled barrel means superb long-range accuracy (beyond 200 yards) with every shot! Only Smith & Wesson could deliver this much power, this much velocity and this much accuracy in a precision, production revolver.
