LH Tan Leather Hunter Holster For PC M500 6-1/2" Barrel

$275.95

Overview

SKU: 19348L000

This left hand leather holster is ideal for carrying the Performance Center Model 500 with a 6-1/2" barrel equipped with the scope of your choice. The slot cut down the top of the holster serves two purposes. First it allows a good fit for a scope but equally as important is to make this large revolver easier to draw. The slot on this holster is cut down to 2" from the muzzle end of the holster, leaving the shooter only 2"" of leather to clear making the draw much easier. We have added ten bullit loops down the side of the holster for your convenience. There are double hammer straps and double snaps for the straps, one strap fits above the hammer spur and the other below the spur resulting in a secure revolver. The holster also comes with a leather harness that fits on your weak side shoulder/neck and a belt and buckle on your chest to adjust the harness to relieve pressure on your belt and can be adjusted one inch at a time. The adjusting process is very simple and can be done while walking. This holster also comes with latigo thigh ties reducing to a great degree the "thigh slap" while walking. It also makes the holster more stable allowing for an easier draw and re-holster of this revolver. Lastly this holster comes embossed with our Smith & Wesson logo, a symbol of excellence.
