Crimson Trace Desert Tan Laser Grip For SW1911
\$349.95

Overview

SKU: 193730000

This Desert Tan rubber grip by Crimson Trace Lasergrips features a laser aiming system engineered to provide customers with increased aiming capabilities. This lasergrip fits the SW1911 and most other 1911's full size frames with grip screws measuring 3-1/8" apart and comes with a front strap activation that gives total control of the laser no matter how the shooter grips the pistol. The center activation switch is housed in a smaller wrap-around portion which allows shooters to get a positive hold on the front-strap checkering. For those who like the look of checkering this is an added benefit. There also is a relief cut to allow the mainspring retaining pin to be removed without taking the grips off. The lasergrips two lithium batteries delivers a bright, continuous beam for maximum visibility and speed. The common, inexpensive batteries deliver over four hours of constant run time and five years of shelf life.

Will not fit any 1911 with an Ambidextrous Safety.

IMPORTANT NOTE:

Grips can only be shipped to addresses in the United States.
