Warne Silver Finish Base for S&W K, L & N Frame
Revolvers
\$169.00

Overview

SKU: 192230000

This Warne Base comes in a Silver finish and is specifically designed for use on Smith & Wesson K, L & N Frame Revolvers. Made from solid steel to handle recoil, this base is the first of its kind. The Smith & Wesson rear sight is removed to install most scope mounts. Warne's base allows the user to reinstall the rear sight and front sight onto the top of the base. The factory sights are then fully functional. The base also accepts all Weaver style scope rings.

For use on pre-drilled revolvers only.
