Professional / Duty

## Overview

SKU: 162414

You can't build an effective and correct handgun without first knowing and talking to the actual shooter. That has always been a Smith & Wesson trademark...we listen. Smith & Wesson, the first and most respected manufacturer for womens' handguns has designed LadySmith™ small frame revolvers because we believe that women should have the power to defend themselves...and that power is best found in a Smith & Wesson.

The Smith & Wesson J-Frame has become the most popular small frame personal defense revolver on the market. With decades of reliable performance to its credit, the J-frame line offers models capable of firing .22 LR, .22 Magnum®, .38 S&W Special and the more powerful .357 Magnum® loads. Smith & Wesson offers these revolvers from our production, M&P, Pro Series, and Classics lines in three diverse hammer designs; internal, exposed and shrouded.
